PROFESSIONAL PROFILE

Analytical **Computer Science professional** with 9+ years of experience in data coordination, technical troubleshooting, and systems architecture. Native Arabic speaker with bilingual English proficiency. Specialist in **data integrity**, **structured feedback**, and **analytical thinking**. Proven ability to evaluate complex technical outputs, manage high-volume data workflows, and work independently in remote settings.

PROFESSIONAL EXPERIENCE

Technical & Data Consultant

06/2023 – Present

Independent Professional Freelancer

- Managing end-to-end technical projects, requiring high-level **analytical evaluation** of system outputs.
- Performing root-cause analysis for complex software issues, translating technical debug info into structured rationales.
- Coordinating with international clients to deliver high-quality, personalized digital solutions under strict deadlines.

Administrative & Data Coordinator

02/2015 – 07/2015

I Am You Non-profit Org

- Managed and **evaluated data** for 1,500+ records, ensuring 100% accuracy and grounded relevance.
- Identified and corrected data discrepancies, performing the equivalent of **quality annotation** for high-stakes beneficiary info.
- Maintained strict data hygiene and confidentiality standards for international humanitarian programs.

Head of Operations & IT

02/2023 – 05/2023

CEDIU – Yemen (Organization)

- Designed and implemented complex data infrastructures for emergency interventions.
- Supervised a technical team, providing structured feedback and clear instructions for multi-turn project phases.
- Ensured all technical documentation was clear, accurate, and referenced specific project requirements.

Founder & General Manager

01/2019 – 12/2022

Eram Design

- Led a digital agency, overseeing the quality and **personalization** of web/app content for diverse users.
- Evaluated project outputs for relevance and user-helpfulness, maintaining a #1 Google ranking through high-quality standards.
- Managed complex team communication, ensuring clear and nuanced feedback for technical development cycles.
